

## FAQ For [WestHollywoodPlumber.com](http://WestHollywoodPlumber.com)

### **Q. What causes clogs in drains?**

**A.** There are many reasons why drains clog overtime. Left over foods, soap, hair and so much more can build up in your pipes, creating a clog.

### **Q. Why is water coming up through the floor?**

**A.** If you have water backing up and coming through the floor, you may have a serious problem with your sewer line that needs attention immediately. Marty's emergency services to take care of these problems before they cause irreversible damage to your property.

### **Q. Why does my water smell like metal?**

**A.** You probably need new iron filters. Iron filters keep the water oxidized; therefore it is important to replace the filter.

### **Q. Do I need a plumber if my toilet is constantly running?**

**A.** If you hear water running in your toilet tank for extended periods, then your toilet is leaking water and wasting tons of water. It is dumping water down the overflow tube and wasting up to 200 gallons of water daily. The problem may be a corroded overflow pipe, flush valve assembly or a worn out flapper valve.

### **Q. When should my water heater be replaced?**

**A.** A well maintained water heater should last around 10 years. Our experienced plumbers will evaluate your water heater and determine if it needs simple repairs or needs to be completely replaced.

### **Q. Why is my faucet dripping constantly?**

**A.** A constantly dripping faucet is typically not a sign of a large problem, but because you are wasting water and money on you bill you need to look into replacing parts of the faucet to working order.
